CARF Gives Highest Rating

Congratulations to ARC Industries and the Franklin County Board of Developmental Disabilities (FCBDD) adult services operations for achieving the highest possible accreditation from the Commission on Accreditation of Rehabilitation Facilities (CARF). In a letter dated October 13, CARF informed the Board that it has received a three year accreditation that will extend through October 31, 2019.

The letter stated that "your organization should take pride in achieving this high level of accreditation" and "CARF commends your organization's commitment and consistent efforts to improve the quality of its services." CARF surveys over 900 standards that demonstrate best practices and by achieving this accreditation, FCBDD and ARC Industries are able to access other funding sources that require CARF accreditation. Congratulations to all the participants, family members, staff and others who participated in the survey and help to maintain quality and stable services in Franklin County.
